

NEOFLEX Logistics Services Industrial Packing S.A., as leading flexitank operator and the manufacturer we provide our clients with flexible service options and cutting edge technology that ensures the best value for money in the market place today. We offer door-to-door bulk liquid logistic service in anytime and anywhere. Flexitank is a mean of bulk liquid transportation. Compare with drum and ISO tank, flexitank can save your time, money and is quite efficient. To different products **NEOFLEX** offers different type of flexitank. It will take about 1.5-2 hours to load or discharge a flexitank. **NEOFLEX's** engineer will attend first loading and discharging to instruct flexitank operation. Believed that **NEOFLEX** will offer more efficient, economical and better bulk liquid logistics services to you and your customer.

FLEXITANK

A flexitank is a bulk liquid container constructed from polyethylene and polypropylene. With capacities up to 24 cubic meters, depends on the Specific Gravity of the liquid, this vehicle of intermodal transportation convert a standard 20'dry container into a bulk liquid container capable of carrying up to 27 tons of product.

The advantage of flexitank is:

- Simplify the loading and discharging procedure. Your customers just need 2 workers to operate within 1-2 hours to discharge.
- Compare with ISO tank, flexitank is specified in one product; more economic, needn't empty return; more quick-offer flexitanks in advance according to schedule. Each number of flexitank will be recorded and followed up globally.
- In export and import, **NEOFLEX** is succeeding in serving leading exporters and importers. We are experienced in international transportation.

Complete And Hassle-Free Service In Flexitanks

- Shipping and Forwarding Services
