

NEOFLEX-D

www.neoflex.com.tr

NEOFLEX-D is a system of extraordinary strength with a unique structural design developed for shipping liquids, pastes and granular products. NEOFLEX-D is an ideal replacement for drums, returnable totes, IBCs. NEOFLEX-D has suitable for various liquid products like as milk, vinegar, edible oil, adhesive, ink etc...

Superior strength and durability using industrial grade corrugated NEOFLEX-D can be stacked two high.

Quick setup by two operator

High speed fills with high viscosity products

Integral locking pallet

Easy disposability 100% recyclable

More efficient use of storage space (80% savings in empty space over drums)

Designed to carry 1000 lt of liquid –as much as six drums in 20% less space.

This advantage can reduce labor and time during filling, storage and transport.

NEOFLEX-D ensure the absolute purity of your product.

Returnable containers have got cost of cleaning, maintenance and recall.

Cost effective for using one way

No pockets or folds to trap residual liquid

NEOFLEX-D can be supply set, including liner, discharged system according to customer needed and pallet.
